

INTEC GmbH 's new Office in England: INTEC Dynamics Ltd.

INTEC GmbH successfully continues its internationalisation and opens up a subsidiary in the important UK market. INTEC Dynamics Ltd. which is located in Leicester is run by managing director Dr. Suresh Gupta, who has developed the UK multi-body market over the last 20 years now. Together with Bjorn van Uem, a multi-body and SIMPACK expert, our UK customers will now benefit from first class local support and engineering services.

England is one of the most important European markets in the world of multi-body simulation. The market is considered to be very diverse, comprising of the rail industry, and the automotive and engine manufacturers, which include the race teams in central England. The buoyant market was enough for INTEC GmbH on the 1st June 2003, to start-up its first 'Daughter Company', INTEC Dynamics Ltd. with the office in Leicester, located at the very heart of the British MBS world.

THIS WAS AN OPPORTUNITY FOR INTEC THAT COULDN'T BE MISSED

Dr. Suresh Gupta, the Managing Director of INTEC Dynamics Ltd. set the cornerstone in bringing multi-body simulation to the UK. Before heading INTEC's new daughter company, Suresh was the long serving Managing Director of MDI United Kingdom, and is well known to virtually all the MBS software users in the UK. Through his experience and knowledge of the market, Suresh is looking forward to the new challenge offered and sees great potential for SIMPACK in the UK. Bjorn van Uem, after stints at Reynard and Jordan, as well as being a former member of the SIMPACK team, looks forward to

being involved with SIMPACK once again. Between Suresh and Björn, a vast amount of 'know-how' can be offered by INTEC Dynamics Ltd. and with the continued support of INTEC GmbH is on track to form a winning team.

SIMPACK's already proven success in the UK offers INTEC Dynamics Ltd. a great start, with installations already in place at Bombardier and at Land Rover, with interest also shown from other companies. Managing Director Suresh is looking to further the focus on existing markets, where SIMPACK already has a foothold. Furthermore he hopes to explore the growing markets of real-time and mechatronic simulation. In being able to market the product SIMPACK, with its outstanding functionality and unrivalled in offering code export and real-time models, he feels rest assured of success in the UK. In addition he knows the first class support offered by INTEC GmbH can be called upon at any time.

MORE INTERNATIONAL PRESENCE FOR INTEC

The founding of INTEC Dynamics Ltd. has given INTEC more international presence within Europe and provides the British customers a contact at home, who is available to answer any queries or to discuss any customer requirements. Right from the word go, INTEC Dynamics will be responsible for a considerable part of INTEC's worldwide business activities and therewith boosting the overall global awareness of SIMPACK, which will be of benefit to all INTEC customers.
