

Hello,

My name is Ute Schmalz. I have been part of the SIMPACK team since November 2000 and I am working with Claus Schwientek in system administration.

After obtaining my Physics degree I began working in the computing branch. I have been mainly involved with quality insurance and other programming tasks.

My duties as a system administrator at INTEC include the Unix system and backup tasks and parts of the Window System Administration. Furthermore I support the internal computer network.

In my free time I am happy being with my family, doing tap dance and reading historical novels.

Hello,

My name is Marcus Sindermann. I was born in 1976 in Bremen where I lived the first 20 years of my life. In 1997 I moved to Munich to study computer science at the Technical University. During my studies I began to work at INTEC where I wrote my diploma thesis on the efficient visualisation of elastic bodies. I finally joined the company as a permanent employee in June 2003.

My main field of activity at INTEC is in the development of the new SIMPACK GUI and I am currently focussing on the new Plot Module.

My hobbies include athletics, where I spend a lot of my free time, as well as ballroom dancing. In addition I often go swimming in the summer and skiing in the winter.

Hello everybody,

My name is Nicola Scherrer. I studied computer science at the Technical University of Munich, where I graduated in 1995. The following years I've been mainly working as a freelancer. I've spent 17 months in Birmingham, UK, before returning to my hometown of Munich at the end of 1999. My fiancé Gerhard Hippmann (who's working on MBS methods) introduced me to INTEC whereupon I joined the SIMPACK development team in February 2003 as a permanent employee.

As the SIMPACK build manager I'm responsible for

- merging the work of the developers, running the build scripts on the six supported platforms and implementing bugfixes if necessary
- maintaining the installation tool for the UNIX platforms and Linux

In addition, the evaluation and introduction of a Source Control Management tool kept me busy during the past year.

In my spare time my main interests are:

- music (concerts, cd collection)
- photography
- sports (gym, jogging, hiking)
- reading novels in English
